

Life is short, play on Stadium

Very high wear tolerance. High drought tolerance. Quick recovery.

Appearance

- ✓ Darkest green colour of all couch varieties
- ✓ Dense growth
- ✓ Fine leaf
- ✓ Quick spring green up (where dormant in cooler climates)

Features

- ✓ Very high wear tolerance
- ✓ Fast runner growth provides quick wear recovery
- ✓ Less mowing due to upward leaf growth
- ✓ Low thatch
- ✓ Suitable for over sowing with rye grass
- ✓ Produces low seed head (a common irritant for people with allergies)

Climatic performance

- ✓ High drought tolerance
- ✓ Performs in heat and humidity
- ✓ Suited to warmer climates

Environmental benefits

- ✓ Low water usage
- ✓ Reduced chemical requirements for treatment of moisture-related lawn diseases

FIND A TURF SUPPLIER

Stadium® Sports Couch has been exclusively bred to suit high profile sporting venues, including golf courses and council grounds.

Stadium® has fast runner growth for quick wear recovery but slower upward leaf growth. The result? A high performance, solid density turf with lower maintenance requirements. It needs less mowing and produces less scalping than most Couches.

Stadium® performs well in warmer climates, including dry heat and humidity, without the major thatching issues that typically occur. With less thatch, it's also less susceptible to moisture-related diseases.

And it doesn't just perform well – **Stadium®** looks and feels good too. It has a quick spring green up after cooler winters.

Stadium® is an efficient water user and highly drought tolerant.

Maintenance

- ✓ Cut to 2cm-4cm every 7-21 days in the warmer months, depending on the frequency of fertiliser
- ✓ For a faster-growing lawn or to increase wear tolerance, simply fertilise more frequently

Stadium® has rhizomes just deep enough to be removed from the wear zone, but not so deep that they take a long time to reshoot. This makes it ideal for sports use.

Remember, infrequent deep watering of your lawn promotes a healthy lawn and a strong deep-rooted system. Watering time is best in the early morning.

Shade tolerance	Low
Drought tolerance	High
Maintenance	Medium high
Wear tolerance	Very high
Winter colour	1.5/10*
Cold tolerance	Low
Best planting time	Anytime
Where it works best	QLD, NSW, VIC
Soil type	Most soil types
Leaf	Fine
Salt tolerance	Low
Seed head levels	Low

*Winter colour rating when fertilised.
Note: Lawn is a living product that performs differently in various environments and seasonal conditions.

Shade Tolerance Low	Drought Tolerance High	Maintenance Medium high	Wear Tolerance Very high
