

The finest lawn of choice

Very high drought tolerance. High shade tolerance.

Appearance

- ✓ Attractive dark green colour
- ✓ Soft to the touch and underfoot
- ✓ Fine leaf
- ✓ Early spring green-up (where dormant in cooler climates)

Features

- ✓ High shade tolerance
- ✓ Very low maintenance
- ✓ Less mowing
- ✓ High wear tolerance
- ✓ High salt tolerance
- ✓ High resistance to insects and diseases
- ✓ Produces low seed head (common irritant to people with allergies)

Climatic performance

- ✓ Very high drought tolerance
- ✓ Performs in heat and humidity
- ✓ High cold tolerance
- ✓ Grows in most parts of Australia

Environmental benefits

- ✓ Low water usage
- ✓ Reduced fertiliser requirements
- ✓ Reduced insecticide, herbicide and fungicide requirements

The finest lawn of choice

Augusta® Zoysia has become one of the most adaptable solid performing lawns on the market offering exceptional drought and shade tolerance. This user-friendly, deep green coloured grass creates a compact smart looking lawn that suits any environment – from residential, parklands and sporting fields.

Augusta® is also recognised for its high shade tolerance and is ideal for those wanting a low maintenance lawn that requires less mowing. Fine-bladed with vertical leaf posture, **Augusta®** offers active families a lawn that is soft to the touch and under foot.

Thanks to a vigorous root system **Augusta®**'s dense re-growth patterns make it an ideal choice for active households with large pets. **Augusta®**'s deep root system also means it is an efficient water user and exceptionally suitable for drought prone regions and an ideal choice for areas with low rainfall or council water restrictions.

Augusta® also prides itself on having higher disease and insect resistance than many other warm season grasses. Strong regrowth patterns mean **Augusta®** can resist weeds.

Maintenance

- ✓ Cut to 2cm-5cm in sun, or 5cm-7cm in shade – lower cuts will resemble a Couch lawn, higher cuts will resemble a Fescue lawn with longer leaf blades
- ✓ Mow every 2 weeks in warmer months, and every 3-8 weeks in colder months
- ✓ Fertiliser is recommended twice a year, with an additional application if the lawn is subject to high levels of wear and tear

Augusta® Zoysia is highly drought tolerant **once established** – but, like all plants, needs water.

Requirements will vary depending on environmental factors. Be aware of a drying climate and water your lawn accordingly.

Remember, infrequent deep watering of your lawn promotes a healthy lawn and a strong deep-rooted system. Watering time is best in the early morning.

For best establishment, **Augusta®** should be laid on sandy soil.

Shade tolerance	High
Drought tolerance	Very high
Maintenance	Very low
Wear tolerance	High
Winter colour	7/10*
Cold tolerance	High
Best planting time	Anytime
Where it works best	QLD, NSW**
Soil type	Most soil types
