

HYDRAMAXX G - 4KG

Dual Action Granular Wetting Agent

Aids water distribution and retention for turf and landscape.

- ▶ Dual acting wetting agent suitable for all potting mixes and soils.
- ▶ Reduces water surface tension, aids rewetting and improves drainage.
- ▶ Improves the efficiency of fertilisers and crop protection products.
- ▶ Long lasting effects after application improves cation exchange capacity
- ▶ Safe and supplied in ready to use formulation.
- ▶ Granular formulation for ease of application.
- ▶ Non toxic and environmentally safe.

TURF AND LANDSCAPE

Key features

- An ideal water management tool in turf and landscape situations.
- Prevents dry patch in turf and improves water percolation in wet soils.
- Easy to use granular formulation which can be top dressed by spreader.
- Provides immediate and long term response.
- Improves the efficiency of fertilisers and crop protection products such as fungicides.
- Non-toxic to plants and environmentally safe.

Where to use

Hydramaxx G is best applied as a top dressing to dry turf and watered in immediately with 5mm-8mm of irrigation. Repeat cycles of low water volume to maximise activity.
